Opeyemi O Agboola

DATA AND RESEARCH CONSULTANT

Analytics and Data Science • Business Research • Public Health

Lagos, Nigeria | +234 810 492 3355 | opeyemiagboola50@gmail.com

Portfolio and project evidence

Consultant profile

Data and research consultant combining statistical depth, public-health expertise and operational leadership. Translates complex survey, qualitative and commercial data into analytical products, management recommendations and policy-facing evidence. Brings an MPH and a BSc in Demography and Social Statistics, with experience spanning research design, reproducible analysis, business intelligence and implementation planning. Leads ONE Light Analytics and builds decision tools that connect rigorous methods with practical use.

Core expertise

Research and advisory: mixed-methods studies, survey design, sampling, qualitative analysis, evidence synthesis and policy briefs.
Analytics and data science: SQL and R workflows, Python applications, survey-weighted modelling, forecasting, segmentation and model validation.
Business intelligence and delivery: executive reporting, interactive dashboards, MEL frameworks, process diagnostics, stakeholder facilitation and operational coordination.

Leadership and professional experience

Founder and Lead Consultant | ONE Light Analytics

2026 to present

- Building an analytics and decision-intelligence consultancy across business research, commercial analytics, public health and practical AI.
- Develops documented analytical workflows, interactive applications and case studies, connecting data preparation and quality checks to interpretation and decision support.

Chief Operating Officer | AMDOR Analytics

Oct 2025 to Sep 2026

- Led operational planning and delivery systems for a data and technology education business, developing SOPs, staffing plans, quality standards and performance routines.
- Worked with instructors to refine analytics curricula and practical projects; coordinated growth and sales workflows across four agents.
- Organised approximately 2,000 monthly leads in Zoho CRM, maintaining visibility of follow-ups, discovery-call outcomes and team activity.

Research and Development Analyst | Flinx Realty Ltd

Jul to Oct 2025

- Led a mixed-methods organisational study involving an 84-staff survey; translated process gaps into a standardisation roadmap for management.
- Designed a monitoring, evaluation and learning framework to track recommendations and implementation across business units.

Research Analyst | NorthStar Insights

Apr 2024 to Apr 2025 | Remote

- Developed research proposals and analysis plans, supported mixed-methods assignments and translated findings into decision-focused reports and presentations.
- Contributed to exploratory health-insurance research using 15 interviews to examine affordability, trust, coverage expectations and access to care.

Consulting and public health experience

Consultant | SANHDEF

Dec 2024 | Lagos State Annual Operational Planning

- Facilitated planning support for 250 participants from 50 health-facility planning cells, including facility leads and monitoring and evaluation officers.
- Reviewed activity plans, timelines and budget inputs with senior consultants to strengthen completeness and consistency.

Public Health Research and Analytics Support | eHealth4everyone

2025 | Volunteer | Remote

- Supported work on health-system intelligence, MSDAT and secondary health data; contributed literature review, monitoring support and evidence translation.

Statistician and Monitoring and Evaluation Officer | Women's Health and Action Research Centre

Jan to Jul 2023 | Ad hoc

- Supported a gender inequality and sexual and reproductive health study through sample-size planning, sampling, field monitoring, data-quality oversight and analytical reporting.

Research Assistant | Federal University Oye-Ekiti

May 2022 to Dec 2023 | Remote volunteer

- Supported pilot studies, data preparation, secondary population-health analysis, literature reviews, qualitative analysis and manuscript preparation.

Selected analytical and policy work

Maternal Continuum of Care in Nigeria. Built a SQL, R and Power BI workflow using the 2024 Nigeria DHS, with survey-weighted indicators and equity analysis across antenatal, delivery and postnatal care. Estimated 24.52% completion of the defined continuum and communicated where service continuity falls.

The Health Insurance Gap in Nigeria. Exploratory NorthStar Insights study based on 15 purposively selected interview participants. Used thematic findings to examine the interaction of affordability, trust, perceived value and healthcare access in insurance decisions.

When Health Data Do Not Connect. Authored a policy brief drawing on the maternal continuum analysis, translating care-pathway evidence into recommendations for interoperability, a minimum maternal dataset, responsible data sharing and continuity monitoring.

Cardiometabolic Screening Intelligence. Developed a survey-aware NHANES research application for elevated HbA1c screening using non-laboratory measurements, with independent temporal validation and calibration assessment.

Executive Performance Intelligence System. Built an interactive web dashboard linking sales, channel margins and inventory exceptions with documented KPIs and reproducible analysis. Demonstration uses Microsoft's fictional AdventureWorks sample.

Education

Master of Public Health | Babcock University | 2026

BSc Hons Demography and Social Statistics | Federal University Oye-Ekiti | 2023

Department Roll of Honours on three occasions; two tuition waivers and two meritorious awards.

Technical tools and methods

R, Python, SQL, Power BI, Excel, SPSS and Stata; scikit-learn, Streamlit and GitHub. Survey weights, regression, imputation, calibration, chronological validation, thematic analysis and reproducible reporting. KoboToolbox, ODK and QGIS; Zoho CRM for operational coordination. Practical AI and agentic workflows are an active development focus.
